Trevor Burke

Professor of Dental Primary Care, University of Birmingham School of Dentistry

Contemporary methods of Managing Caries – Fact or Fiction?

This presentation will examine the literature on the effectiveness of recently-introduced methods of managing caries, such as Ozone and PhotoActivated Disinfection (PAD).

Trevor graduated from Queens University in Belfast. He worked in general dental practice in Manchester from 1974 to 1996, also working in the Unit of Restorative Dentistry at the University of Manchester. He has been Professor of Primary Dental Care at the University of Birmingham and Honorary Consultant in Restorative Dentistry since 2000. He has authored or co-authored 230 papers in peer-reviewed journals and been awarded over 75 research grants. His main research interests include properties and applications of tooth-colored restorative materials, clinical evaluation of materials and their performance in general dental practice, the design of an index of oral health for clinical audit and quality control, and ill health retirement among dentists. Dr. Burke is also an examiner for the Royal College of Surgeons of Edinburgh, is on the Board of Dental Protection and is the Editorial Director of Dental Update.
